EDUCATION

University of California, Los Angeles

Bachelor of Arts, Computer Science and Linguistics; Bachelor of Arts, Communications Studies **3.916 GPA**
Honors: Cum Laude, Dean's Honors List

Los Angeles, USA

2020 – 2024

SKILLS

AI Engineering: Claude, MCP servers, AI-assisted/agentive development, prompt engineering, LLM integration
Programming: TypeScript, Go, Python, Java, SQL, C++
Web & Mobile: Next.js, React.js, Node.js, Express.js, NestJS, Fastify, React Native (Expo), tRPC, FastAPI
DevOps & Cloud: Docker, AWS, Kubernetes (EKS), GCP, Git, CI/CD, Unix/Linux
Data: PostgreSQL, Redis, Prisma, MySQL, MongoDB, Kafka
Concepts: RESTful/RPC APIs, Microservices, AI/LLM Integration, Web3 (Hedera)
Languages: English, Mandarin, Korean

JOB EXPERIENCES

CodeChef Consulting LLC

Los Angeles, CA

Full Stack Software Developer | TypeScript, React Native, Node.js, Next.js, tRPC, PostgreSQL, AWS

May 2025 – Present

- Ship **production-ready full-stack mobile and webapps at startup speed** for **5+ early-stage companies** (AI, music/social, web3, fintech) — owning features end-to-end from **Next.js / React Native** frontends to **Node.js** APIs and databases.
- Leverage cutting-edge **AI engineering** tools to ship software faster — **Claude** and **Cursor** for agentive/AI-assisted development.
- Partner directly with **founders, product leads, and designers** as a **consultant, not just an implementer** — joining product and design meetings to exchange ideas, challenge assumptions, and **co-own product decisions** that best serve each startup's growth.

Moio — K-pop fan community app (iOS/Android)

- Built full **Node.js** backend — an **Express + tRPC** API (45+ routers via schema-driven codegen with **trpc-shield** authz and Clerk JWT) powering a **React Native / Expo** app with social feed, polls, and **Stripe Connect** fan-crowdfunding.
- Built full **React Native / Expo** frontend — an infinite-scroll **social feed** with posts, comments, and polls/voting, plus a custom **avatar & “aura” profile system** — styled with **NativeWind** and animated with **Reanimated**.
- Engineered an **MCP (Model Context Protocol) server** giving AI assistants **governed, read-only SQL and a semantic schema layer** over production data, with per-tool audit logging — enabling natural-language analytics.
- Built a daily **cron job system** (pledge settlement, reminders, Stripe Connect health checks, **Ticketmaster** sync) and shipped continuously to production via **EAS OTA** updates.

Kalo — Events & RSVP creator platform (web)

- Built **Next.js** frontend components that surface the platform's **AI (Gemini) creator-scoring modules** (brand-fit, pricing, audience quality), and implemented backend **email / notification services** (SendGrid).

AddWrk — field-service work-order SaaS (iOS/Android + web)

- Built the **React Native** mobile app and React web app on an **Express + tRPC + Prisma** backend with **Auth0** auth, **Stripe Connect + RevenueCat** subscriptions, and **Puppeteer**-generated invoice PDFs.
- Integrated **Google Gemini** (gemini-2.5-flash, multimodal) to **auto-generate structured work-order estimates from uploaded job-site video, audio, and photos** via schema-constrained outputs.

Tiktok Inc., Music Team

San Jose, CA

Backend Engineer I | Golang, Redis, SQL/NoSQL, AWS, Microservices/Distributed System

July 2024 – May 2025

- Develop platform **APIs (HTTP, business logic, account auth)** for large music labels using **Go**, contribute to **\$1M+ revenue**.
- Independently build TikTok's only SaaS music algorithmic promotion tool, integrating backend RPC APIs with frontend and utilizing cloud **microservices (serverless AWS Lambda, EC2, DCM)** to achieve an **event-driven, scalable distributed system**.
- Design and maintain data pipelines for music promotion platforms; **ORM and SQL** to manage queries, **Redis** for quick-cache storage.
- Enhanced CI/CD by optimizing code review workflows (**stacked PRs**), reduce tech debt by **improving unit test coverage by 400%**.

Tiktok Inc., Audio/Video team

San Jose, CA

Android Engineer Intern | Gitlab/Git, C++, Java, OpenGL

June – September 2023

- Implemented video encoder optimizations, reducing upload latency by **~200ms** and **enhancing performance for 10B+ users**.
- Communicated with 2+ XFN teams to optimize the SDK in a multithreaded environment, align with **Google** developers on latest updates of the **AMediaCodec Android API**.

MUSIC

PreCraSt Inc.

Remote

AI Music Production Intern | Suno AI, Ace Studio, LANDR, Audimee, Logic Pro X, Pro Tools

February – May 2026

- Used **AI music tools** to rapidly generate complete demo tracks from the Main Producer's creative briefs, then refined and produced the material to “**de-AI**” the sound for professional release.
- Delivered up to **30 approved demo tracks per month**, making revisions as requested by the production team.

Freelance Music Producer

Global

Topliner, Producer, Audio Engineer | Logic Pro X, Ableton Live, Pro Tools, Suno, TuneE AI

May 2025 – Present

- Launched “**Can I Write About Your Story?**” — producing **100 songs for 100 people**, a 100% customized songwriting experience.

- Produce and mix custom songs end-to-end in **Logic Pro X / Pro Tools**, integrating **AI tools (Suno, Tunes AI)** into a professional production workflow.

@ROOM4A Music Studio (Shanghai) — Producer/Audio Engineer Intern; wrote, produced & engineered 10+ songs for the studio's song bank (Voice of China). *Dec 2020 – Dec 2021*

PROJECTS

CREAM – Music Creation Plug-in and Desktop App

Remote (Los Angeles, Korea)

Founder and Full Stack Developer | C++, JUCE

June – August 2022

- Led development of a music synthesizer application capable of real-time instrument playback audio using **C++ and JUCE**.
- Constructed 10+ backend parameters for audio manipulation such as oscillators, filters, and reverb using the **DSP module in JUCE**.

Homeless Simulator – Qwerhacks Hackathon Project

Los Angeles, CA

Leader and Frontend Developer | JavaScript, HTML, CSS, React

March 2023

- Created a web-based **interactive game** to raise awareness for the unhoused using **HTML, CSS, React.js** and **Material UI**.
- Won first prize in housing insecurity track and best webapp: <https://homeless-simulator.vercel.app/>
